This is for the performance of the repair contract by the workshop you have tasked.

The workshop you have tasked communicates your data to a partner for invoice verification in the event of complaints as well as payment and service issues. This partner is in Germany. For the performance of the payment contract, your data is also transferred to our payment processing service provider, MSC. In the event of default, DTAG will also share your data with the DTAG sales company local to your headquarters. This will ensure that these partners are subject to the same contractual obligations regarding confidentiality, data protection and data security.

Data transmission to a third country

For the performance of the repair contract, DTAG also share data with workshops outside the European Economic Area (EEA) or grants them access, depending on where the workshop you have tasked is located. Because countries outside the EEA usually do not have the same level of data privacy as the EU, DTAG ensure by way of contract that the workshops take measures to ensure that data is protected in accordance with the EU/EEA standards. Daimler Group companies are also governed by the strict data privacy requirements of the Daimler Group.

Duration of data storage

DTAG store your personal data for as long as it is required for the performance of the Roadside Assistance Contract. DTAG also store personal data beyond that if it is required to do so by law. For example, invoices must be stored for a period of ten years. DTAG also store customers' personal data until the end of the applicable periods of limitation in order to assert any existing legal claims.

To process data as described above, MSC processes your personal data on the basis of a legitimate interest pursuant to Art. 6(1)(f) EU GDPR.

MSC currently uses the following service provider to conduct debt collection procedures: coface Debitorenmanagement GmbH, Isaac-Fulda-Allee 1, 55124 Mainz, Germany.

In the event of payment default, we are authorized to contact the respective company and/or corresponding local dealer as part of the dunning/collection process and to ask them to provide assistance with resolving the payment default. All necessary data is sent to the respective company and/or corresponding local dealer when this is done.

If MSC is unable to obtain payment at the end of the dunning process or collection procedure, the customer's data is put onto the so-called "blacklist" of DTAG. This means that no further services can be used on the DTAG service network through MSC.
